WORK EXPERIENCE

TUS Solution – Software Development Engineer

Feb 2024 – Now

- Working on the development of the tuss.io platform, a technological solution for efficient company management.
- Actively involved in software development research, making migration guides, creating tech stack, and conducting user surveys
- Writing and optimizing high-quality, maintainable code as a full-stack software developer.

Mezorn – Software Engineering Intern (Junior Software Developer)

Aug 2023–Jan 2024

- Built studio.mezorn.com, a code-free website generation platform for front-end developers and designers to generate static websites in a short amount of time
- Launched studio.mezorn.com; showcasing a substantial 20% boost in efficiency and productivity
- Contributed to numerous projects in JavaScript frameworks following the UI design guidelines and quality requirements; wrote readable and maintainable code

Tomujin Digital Tech - Backend intern

Oct 2022 – Feb 2023

- Contributed to the backend development for Elf Hearts, a mobile educational application catering to Elf Education companies using Nest JS and Typescript
- Processed Entity-Relationship Diagrams (ERD) and managed data within the MySQL database to ensure functionality and data integrity.

Fractal Technology – Frontend Intern

March 2023- May 2023

- Developed dynamic e-commerce websites using HTML, CSS, React, and Tailwind CSS.
- Actively engaged in skill enhancement within the frontend domain, embracing opportunities to refine and expand my capabilities.

LEADERSHIP

Scientific Project Conference in MNUE - Team Leader

June 2023 – July 2023

- Designed a remote-controlled selfie hand using Arduino Uno, a Relay module, and an IR receiver
- Built the model product and participated in an academic project competition, winning a silver medal

ADRF Mongolia NGO - “Dudu project” Volunteer Teacher

June 2023 – Aug 2023

- Developed Tech Club academic curriculum with a focus on foundation programming principles
- Taught basic programming to 12 students using Scratch and Arduino
- 84% of students successfully completing independent programming projects by the end of the course
